Info og tips og triks til plugins vi bruker, uavhengig av hvor de kjøres.

Se også Velocity

De fleste kommandoer fungerer via console i Discord, men ikke i console i CLI.

Mer teknisk info, nedlastingslenker etc på Setup.

AKTIVE PLUGINS

LUCKPERMS

Web: https://www.spigotmc.org/resources/luckperms.28140/

Download: https://luckperms.net/download

```
/lp editor
```

- få link til å åpne web editor

```
/lp user BRUKER promote/demote
```

- flytt opp og ned på track - lagt alias til /promoter

```
/lp user BRUKER group remove GRUPPE
```

```
/lp user <name> permission check essentials.balancetop.exclude
```

For å endre rettigheter fra konsoll må man bruke

```
/lp group default permission set some.permission true
```

WORLDGUARD / WORLDEDIT

Web: https://dev.bukkit.org/projects/worldguard

Docs: https://worldedit.enginehub.org/en/latest/

Eksempel protecte spawn i survival:

1. marka med

```
//wand
```

2.

```
/rg define spawn
```

3.

```
/rg addowner spawn g:admin
```

(antar at det er ok å bruke grupper fra luckperms?)

4.

```
/rg flag spawn use allow
```

Greit å gjøre alt via

```
/rg list
```

faktisk

GRIEF PREVENTION

Docs: https://docs.griefprevention.com/configuration/

Dette er i config.yaml:

```
    Expiration:
    ChestClaimDays: 180
    UnusedClaimDays: 180
    AllClaims:
      DaysInactive: 180
      ExceptWhenOwnerHasTotalClaimBlocks: 10000
      ExceptWhenOwnerHasBonusClaimBlocks: 5000
```

Tips: sneak + pinne: nearby claims

ESSENTIALSX (INSTALLERT MANUELT)

Web: https://essentialsx.net/wiki/Home.html

Download: https://essentialsx.net/downloads.html

Support: MOSS Discord - https://discord.gg/h8CnPSw

Perm: se egen wiki side: EssentialX permissions

En del sider som ikke er klikkbare på nettsiden: https://essentialsx.net/wiki/Text-Commands.html (om (/help og /motd osv) https://essentialsx.net/wiki/Keywords.html

Reload essentials config:

```
/ess reload
```

/help

help.txt med "#kapitler" - er nok det beste.. så funker /help admin og /help vip

Støtter pr 28.2.2024 ikke minimessage

CITIZENS (INSTALLERT MANUELT)

Web: https://wiki.citizensnpcs.co/Citizens_Wiki

Download: https://ci.citizensnpcs.co/job/Citizens2/

Support: Denizens & Citizens Discord: https://discord.gg/Q6pZGSR

Kommandoliste: https://wiki.citizensnpcs.co/Commands

```
/npc create &amp;quot;Klikk for PVP kit&amp;quot; --type ENDERMAN -s
```

```
/npc lookclose
```

```
/npc TYPE bytte skin
```

https://wiki.citizensnpcs.co/Frequently_Asked_Questions#%22Hi,_I'm_npc%22_keeps_appearing_after_I_removed_text_from_an_NPC

```
/trait text
```

(for å fjerne text-greia)

```
/trait [traitname]
```

for å toggle av og på

```
/npc command add &quot;kommando til å kjøre&quot; -p
```

(-p betyr å kjøre som player)

HUB kreativ:

```
/npc skin --url https://minesk.in/1d6ff8c3ac5c418e83e29bc8325f603b
```

pvp:

```
/npc skin --url https://minesk.in/e5ef853e3e714a78bc1d02e551231191
```

survival:

```
/npc skin --url https://minesk.in/8e18c3eac1a343a2b299ad30594cd349
```

LUSHREWARDS (TIDLIGERE ACTIVITYREWARDS)

Web: https://github.com/OakLoaf/LushRewards

Download: https://modrinth.com/plugin/activity-rewarder/versions#all-versions

Docs: https://dave-12.gitbook.io/lush-rewards

Discord: Lush Support - https://discord.gg/p3duRZsZ2f

* Satt opp en NPC i survival som kjører /rewards når trykket på, slik at rewards mottas i survival-verden (og ikke hub/pvp/kreativ) * playtime rewards gir penger i stedet for ting, siden penger deles på alle verdener

JOBS REBORN (INSTALLERT MANUELT)

Web: https://www.spigotmc.org/resources/jobs-reborn.4216/ - måtte installere manuelt

Discord: zrips plugins - https://discord.gg/hAGMmPP

Trenger også: https://www.spigotmc.org/resources/cmilib.87610/

Mye bra info og eksempler: https://github.com/mrfdev/Jobs/tree/main, f.eks. https://github.com/mrfdev/Jobs/blob/main/Resources/FAQ/jobs-economy.md#permissions

Kan også sette opp random quests der :)

Jobber: Woodcutter Miner Hunter Farmer Explorer Digger Builder

COMMANDPANELS

Web: https://www.spigotmc.org/resources/commandpanels.67788/

CHESTSHOP

Web: https://www.spigotmc.org/resources/chestshop.51856/

Download: https://ci.minebench.de/job/ChestShop-3/lastStableBuild/

God guide: https://skogliv.no/kistebutikk/

Funka uten å legge til permissions, men har gitt default chestshop.shop.* og admin chestshop.admin

SQUAREMAP

Web: https://github.com/jpenilla/squaremap

Docs: https://github.com/jpenilla/squaremap/wiki

Kjører da docker-swag (https://github.com/linuxserver/docker-swag) i samme docker-compose.yml som mc-serveren, og setter root i

```
~/minecraft-server/swag/nginx/site-confs/default.conf
```

til

```
/data/plugins/squaremap/web
```

COREPROTECT

Web: https://docs.coreprotect.net/

Download: https://github.com/PlayPro/CoreProtect/releases/latest

CRISTICHI’S TREE CAPITATOR

Web: https://dev.bukkit.org/projects/cristichis-tree-capitator/

OBS! Satt som default at man må crouche for å kappe ned! Få det inn i docs.

VIAVERSION & VIABACKWARDS

Web: https://www.spigotmc.org/resources/viaversion.19254/

Download: https://hangar.papermc.io/ViaVersion/ViaVersion/versions

Web: https://www.spigotmc.org/resources/viabackwards.27448/

Download: https://hangar.papermc.io/ViaVersion/ViaBackwards/versions

ADVANCEDSERVERLIST (INSTALLERT MANUELT)

Web: https://asl.andre601.ch/

Download: https://modrinth.com/plugin/advancedserverlist

Config i config-filer

ANTIPOPUP

Bare funker tydeligvis.

DECENTHOLOGRAMS

Web: https://www.spigotmc.org/resources/decentholograms-1-8-1-20-4-papi-support-no-dependencies.96927/

Docs: https://wiki.decentholograms.eu/general/setup/

Nice :)

BETTERRTP

Web: https://www.spigotmc.org/resources/betterrtp-random-wild-teleport.36081/

PLACEHOLDERAPI

Web: https://www.spigotmc.org/resources/placeholderapi.6245/

Docs: https://wiki.placeholderapi.com/

Funker bare av seg sjøl?

```
/papi ecloud download Statistic
```

```
/papi parse frittmenneske %statistic_hours_played%
```

SIMPLESCORE

Web: https://www.spigotmc.org/resources/simplescore-animated-scoreboard.23243/

default perm: togglescoreboard

CHUNKY

Download:

Pregenererer chunks, litt ressurskrevende når det står på. Kjekt å sette worldborder først.

<pre>/worldbordet set 10000 /chunky worldworder /chunky start /chunky quiet 30</pre> Tar mye RAM, så greit å restarte server etterpå.

SILKSPAWNERS

Web: https://dev.bukkit.org/projects/silkspawners/files/latest

OBS: Bør trolig erstattes av https://dev.bukkit.org/projects/spawnersilk som ser ut til å oppdateres

oftere.

Permissions: Default: silkspawners.silkdrop.*

Tror ikke vi trenger flere per nå, men full liste her:
https://dev.bukkit.org/projects/silkspawners/pages/permissions

MINIGAMES

BENTOBOX

https://docs.bentobox.world/en/latest/

INFINITE PARKOUR

https://github.com/Efnilite/Walk-in-the-Park

Start med /ip

ONE IN THE CHAMBERS

https://www.spigotmc.org/resources/one-in-the-chamber.81185/

docs: https://github.com/Despical/OITC/wiki

KING OF THE LADDER

https://www.spigotmc.org/resources/king-of-the-ladder.80686/

docs: https://github.com/Despical/KOTL/wiki
